Subject: RoHS Compliance Statement

Date: August 20, 2025

In 2015 the European Union published the RoHS Directive (2015/863), also referred to as RoHS 3, which restricts ten hazardous substances including Lead, Mercury, Cadmium, Hexavalent Chromium, PBBs, PBDEs, DEHP, BBP, DBP, and DIBP. Threshold limits remain 1,000 ppm (100 ppm for Cadmium and Mercury).

Although wire products themselves are not classified as “electrical and electronic equipment” (EEE) and do not require a CE mark, they are components within finished products that must conform to the RoHS directive. Compliance throughout the supply chain ensures full alignment with RoHS and related environmental regulations.

Marmon Defense certifies that all qualified wire and cable products comply with RoHS Directive 2015/863.
