SUSHI CHEF SPECIAL

Daily Asian-inspired selection from our sushi chef.

Eating raw or undercooked meats, poultry, seafood, shellfish or eggs may increase your risk of food-borne illnesses, especially if you have certain medical conditions. If you suffer from any liver, stomach, blood or immune diseases, you should eat these foods fully cooked. Sushi kitchen and hot kitchen are two separate kitchens.

“As I ate the oysters with their strong taste of the sea and their faint metallic taste that the cold white wine washed away, leaving only the sea taste and the succulent texture, and as I drank their cold liquid from each shell and washed it down with the crisp taste of the wine, I lost the empty feeling and began to be happy and to make plans.”

– Ernest Hemingway, *A Moveable Feast*
