

Dispense Safe™ Glove Dispensing System

Glove Dispensing

Dispense Safe™ Glove Dispensing Systems

Exposed glove boxes on counters are a hot spot for contamination, creating potential health and safety hazards. Dispense Safe is the engineered solution.

Ideal Markets

Animal Care | Automotive | Blood-Borne Pathogen Compliance | Cosmetology | Day Care Centers | Facility Maintenance | Foodservice & Food Processing | Industrial | Janitorial | Landscaping

ONE-AT-A-TIME GLOVE DISPENSER PROMOTES SAFETY, REDUCES CLUTTER, HANGS ANYWHERE

Our fully enclosed dispensers reduce contamination by eliminating glove boxes on counters, which get wet, dirty, and become breeding grounds for dangerous bacteria. The Dispense Safe™ system keeps access to right-type, fresh, clean gloves convenient to each prep area and washing station, increasing employee compliance.

These wall-mounted dispensers improve efficiency by freeing up counter space and make good economic sense because one-at-a-time dispensing reduces waste. They can be installed virtually anywhere, even in vehicles like ambulances and food trucks.

Dispense Safe™ Glove Dispensing System

Glove Dispensing

- New, made-in-the-USA—ask about customization
- Smaller—uses less wall space
- Free up counter space, reducing clutter, contamination
- Easy access to gloves helps increase employee compliance
- Increase safety and health awareness
- Fully enclosed dispensers reduce chance of contamination
- Accommodates vinyl, latex, and nitrile gloves
- Reinforced hinges for long wear life

Adhesive backing strips for no-holes mounting or to hold unit in place for screw-in installation.

Stabilizing arms accommodate different box sizes and keep package flush against angled dispenser cover. This snug fit keeps the box securely positioned over the opening and helps assure one-at-a-time dispensing.
