

## Profile

Servolift hygienic conveyor systems are unique on the market, as they are the only true sanitary roller system you can find. The entire system is produced in either 304 or 316L stainless steel, uses only white FDA qualified plastic and elastomers and of course is 100% sealed for easy cleaning. Servolift custom produces each system to your exact needs and can integrate them with our lifting systems, or your existing production situation.

## Options:

- Totally enclosed chain drive
- Accumulation stations
- Gravity fed
- Pusher and diverter systems
- Integrate with drum lifter for ergonomic drum emptying system

## ULTRA-CLEAN SYSTEM

Totally enclosed drive with sealed roller entrances. Powered driven with accumulation sections, bends, diverters and all other required functions.
