

Drum Lifter with Manual Clamping

FORWARD TIPPING

PROFILE

One of our most popular lifter designs, we refer to this machine as a "Single Arm Drum Manipulator".

Ideal when only one or two different drum diameters are used.

The unit features a simple and foolproof manual clamping system and offers the least possible ceiling height requirement of any machine on the market.

FEATURES

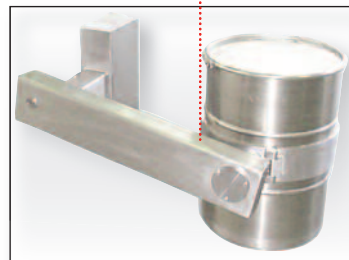

- Design meets or exceeds cGMP/USDA
- Any lifting height, overhang, capacity, drum size and type
- Failsafe lifting system, loads can never drop
- Endless Options: Tipping forwards, sideways, telescoping arms, different clamp types.....
- Free-standing or ceiling supported system
- 304, 316L, & Hastelloy Construction
- Explosion proof for all dust and solvent atmospheres
- Pneumatic, relay logic or PLC controls, on board or remotely operated
- Each system customized per your application

SIDEWAYS TIPPING
