The Advantage: Proven Designs - Fully Customized - Unmatched Experience

Profile

A common ergonomic problem: moving large Fluid Bed Bowls between both the Granulation Loading Point, Fluid Bed Processor and Washing area.

To solve this Servolift produces several different designs, each based on the brand of Fluid Bed being used. One such machine is shown herein. This particular unit features a very small footprint and an automatic docking and lift system to easily drive the bowls around, thus allowing any operator to work in the operation.

Typical Options:

- Lifting of the rear of the bowl frame
- Tow-Bar attachment

Design Capabilities

- Towing capacity to 15,000 lbs
- Battery Powered Drive System
- All Stainless Steel cGMP design, full washdown
- Integrated Charging System, just plug into 110 outlet
- 100% customizable for any possible application!
