

Mobile Lifting Systems

PROFILE

Since 1976 we have engineered and manufactured thousands of mobile lifting devices, solving diverse handling issues not only for the pharmaceutical companies but also for the metallurgical, cosmetics, chemical, plastic and food industries. Our great wealth of knowledge and experience earns confidence in our clients, they know our solution is proven.

Ergonomics and containment are generally the driving force behind purchasing our mobile lifters—giving all Employees the ability to work in areas otherwise designated as dangerous or physically strenuous. Mobile devices can also increase productivity offering a quick return on the investment.

DESIGN

- Totally enclosed construction meets or exceeds cGMP / USDA requirements
- Most reliable design, thousands in use worldwide
- Failsafe lifting, loads can never drop
- Capacity, lift height and overhang per your requirements
- Explosion proofing, battery power, plug-in electric or pneumatic power
- Carbon steel or stainless steel construction
- Powered lifting, clamping, reaching & driving
- Cleanroom conformity to class 100
