

PANTINT® EASY DISPERSIBLE PIGMENT POWDER PREPARATIONS

Unmatched performance, environmentally
friendly and cost effective.

The PanTINT® portfolio of easy dispersible pigment powder preparations represent our latest advances in **MIX-ONLY** dispersion science for the Coatings, Ink and Construction markets.

Do more with less as these highly concentrated powder preparations will allow you to reduce processing times, *avoid milling operations*; while achieving better color development and consistency.

These 100% solids /**Zero VOC** pigment preparations cover a wide range of systems. Your carbon footprint will be reduced contributing towards your **Environmental** and **Sustainability** programs.

The PanTINT® EDPPP Line-up

Water-based systems

- **2 Series:** Resin-free system featuring fast stir-in capability. For use in coatings, stains, aerosol, ink and concrete applications.
- **4 Series:** Features an acrylic resin system designed for wood and UV coatings and stains where high intensity color and transparency are desired. Ideal for ink jet applications.
- **18 Series:** Features an acrylic system designed for aqueous coatings and gravure inks where high intensity color and transparency are desired.

Solvent-based systems

- **5 Series:** Urea-aldehyde carrier providing a wide color palette for powder coatings systems.
- **NEW 6 Series:** Resin-free system suitable for most resin and solvent systems. Pigment loads up to 88%. Ideal for achieving VOC compliance formulations.
- **11 Series:** Vinyl co-polymer resin system delivers color for PVC film, coatings, printing and ink jet inks.
- **12 Series:** Hybrid acrylic system for Industrial and UV coatings.
- **13 Series:** CAB resin system providing color, transparency and gloss primarily for Automotive and UV coatings / stains.
- **14 Series:** Modified rosin ester system providing color and gloss for alkyd coatings and aliphatic solvent systems.
- **16 Series:** Ethyl cellulose system delivers transparency and color for coatings and stains.
- **19 Series:** Epoxy, polyester and similar resin systems for coatings, inks and other applications.

Why Easy Dispersible Powder Preparations?

- Zero VOC
- MIX ONLY - No milling necessary
- Disperses in minutes
- 100% solid powder preparations
- Organic and inorganic pigments available
- Higher pigment loads
- Most pigment particle sizes under 200 nanometers
- Optimal pigment color and gloss development
- Transparent and opaque colors available
- Indefinite shelf life / Non-flammable storage
- Contributes towards your sustainability and environmental programs
- Reduced carbon footprint
