MANUFACTURING INDUSTRY SAFETY

COMPLETE **PERSONAL PROTECTIVE EQUIPMENT**

Manufacturing is the lifeblood of the economy, and keeping workers safe and productive is paramount. Brass Knuckle's full suite of protective eyewear, gloves, and ergonomic products inspires compliance to help keep workers safe and production lines moving. Each product is meticulously researched, designed, and made to be the best in its category ... at a price that's nearly impossible to resist.

HAND PROTECTION

EYE PROTECTION

ERGONOMICS

We offer a full range of safety products

Manufacturing environments bring the potential for a little bit of everything—repetitive motion injuries, sharp surfaces and pinch hazards, dust and debris, extreme temperature shifts, and more. But if a protection product isn't comfortable or easy to work in, people won't wear it. Ours meet high standards of wearability and quality.

Protect your workers from
manufacturing hazards

Brass Knuckle checks all the boxes when it comes to certifications, standards, and compliance.

BKDST-1010N	Grasshopper	Dust Goggle/Spectacle Combo, Soft EVA Foam Dust Filter, Super-Flex Temples	

Come out of the fog.

Our anti-fog lens coating uses a groundbreaking technology that delivers better and longer-lasting fog-free protection than that of competitive anti-fog coated products. Our BK-Anti-FOG and BK-Anti-FOG+ coatings provide extreme anti-fog performance and improve both worker safety and productivity. The toughest anti-fog standard in the world is the EN 166/168 standard. We didn't set out to meet it, we crushed it.

ERGONOMIC PRODUCTS

Part Number	Characteristic
BKBS	Back Support Belt, Elastic Suspenders, Tapered Abdominal Panels

Ergonomic back support.

The Brass Knuckle® BKBS back support offers reinforcement than can help workers avoid back injuries and fatigue in occupations that require stooping, lifting, carrying, or even holding static positions for long periods of time.
