

# Egress Filtering

How to implement egress filtering with out becoming  
the most hated person in the organization

# Intro

- ▶ Name: Archie Woodworth
- ▶ Employer: MaineHealth
- ▶ Position: Sr. IT Security Engineer
- ▶ Background:
  - ▶ IT audit
  - ▶ Policy and program management
  - ▶ Technical and hands-on
- ▶ Contact: [awoodworth@mmc.org](mailto:awoodworth@mmc.org)

# Approach

- ▶ Recon & Research
- ▶ Project Planning
- ▶ Management Buy in and Support
- ▶ Phased Approach
- ▶ Implementation Process
- ▶ Conclusion
- ▶ Questions

# Recon & Research

- ▶ Lots of sites and subnets spread out all over the state
- ▶ Lots of outbound traffic
- ▶ Lots of questions

# Project Planning

- ▶ Project Charter
- ▶ Project Plan
- ▶ Approach

# Management Buy in and Support

- ▶ Really important
  - ▶ Someone has to back you
  - ▶ Someone has to make decisions
- ▶ Technology & Infrastructure Governance Committee

# Phased Approach

- ▶ Start small
- ▶ Communicate
- ▶ Build on your successes
- ▶ Then just go for it

# Implementation Process

- ▶ Pick location/subnet(s)
- ▶ Monitor traffic
- ▶ Research get approvals if needed
- ▶ Add to existing rules or create new
- ▶ Schedule and communicate
- ▶ Implement block rule
- ▶ Monitor and adjust as needed

# Conclusion

- ▶ So far the approach seems to be working
  - ▶ I haven't broken anything major
  - ▶ Change control meetings area a breeze
  - ▶ Yes, I do get blamed for stuff, but egress filtering is generally not the culprit
  - ▶ I have not become the most hated person in the organization
    - ▶ Well not because of egress filtering anyway
