

LASTING COMFORT IN ALL SITUATIONS

- Excellent protection from wind and cold
- Continued comfort indoors and out
- Durable performance for the life of the garment

WINDSTOPPER® Fabric – Unsurpassed wind protection and comfort

Protection from Wind and Cold

Being comfortable outdoors means being protected against wind chill, a combination of both air temperature and wind speed that increases heat loss and discomfort. Unlike conventional sweaters and fleece garments, WINDSTOPPER® fabric completely blocks the wind, keeping you comfortable longer during exposure to a wide range of weather conditions — wind, cold, and light snow.

Comfort Indoors and Out

As a police officer who works in a wide variety of environments, both indoors and outside, you do not want to continually add and remove layers to remain comfortable. With highly breathable WINDSTOPPER® fabric, you can remain comfortable indoors because it allows moisture vapor to escape from the garment, keeping you cooler and drier. At the same time, the fabric combines the highest level of breathability with total protection against wind to keep you warm outside with fewer layers and less bulk.

Maximum Durability without Sacrificing Comfort

Durability is essential in a garment worn during the rigorous operations you perform as a police officer. WINDSTOPPER® fabric maintains its high level of performance over time, even with repeated wash/dry cycles. It is specifically engineered to last longer than other windproof fabrics without compromising your protection or comfort.

Solutions for All Your Needs

W. L. Gore & Associates has engineered WINDSTOPPER® fabrics with a broad range of textiles to deliver light-weight comfort with additional features such as high visibility, excellent abrasion resistance, or increased flexibility. If you are on the go all the time — in and out of a patrol car or leaving your station to respond to a call, Gore can provide a WINDSTOPPER® fabric to meet your garment and glove needs.

The Gore Advantage

For 30 years, W. L. Gore & Associates has been a pioneer in developing high-performance barrier fabrics for law enforcement, domestic preparedness, firefighting, EMS, technical rescue, and military applications. Contact a Gore sales associate today for assistance in selecting the right barrier product for your specific application.

WARNING: No products, including garments, footwear, and gloves, protect completely, even when new; their protective performance will decline with wear, tear, abrasion, and other damage associated with use.
