

iCombi® Classic.

Productive. Robust. Reliable.

Your ideas. Implemented the way you want.

Are you pushing yourself to the limit day after day while staying creative? Producing large quantities of food that meet your own high standards? Doing a dozen things at once while remaining focused? Business as usual for chefs. But maybe we can improve on that. Say, with a single cooking system that does as much work as a kitchen full of equipment. One that can roast, grill, bake, deep-fry, braise, and steam. A hard-working, easy-to-use system that can meet the hectic demands of a professional kitchen. A system that makes your ideas reality. Reliably. On your terms. And turns out high-quality results.

➤ **The result**

The iCombi Classic. A solution for skilled chefs looking for reliable technology to help them with day-to-day challenges.

The iCombi Classic.

More than the sum of its parts.

The iCombi Classic is genuinely multitalented, and will quickly become an indispensable part of your kitchen. Robust, powerful and efficient, it replaces numerous conventional appliances while taking up less than 11 ft² of space. Easy to operate. Packed with functions that ensure top-quality cooking. As an experienced chef, you'll get the results you're looking for every time.

➔ **The winning combination**
A tool that boosts productivity as well as food quality.

Easy to use
Rotary dial with push function, color display, clear interface symbols - intuitive controls to minimize user error.
➔ Page 08

Easy programming
Program up to 100 custom cooking sequences with up to 12 steps in each. Results: infinitely reproducible.
➔ Page 08

ClimaPlus
High-performance dehumidification and humidity settings adjustable in 10% increments help you create a precise cooking cabinet climate. Great results, fast.

Expanded networking
An optional LAN or WiFi interface allows the system to be integrated into ConnectedCooking, RATIONAL's networking solution. Used for hygiene documentation, central creation of individual programs, and much more.

Fans
Optimized cooking cabinet geometry and up to three fans help distribute heat perfectly, which directs maximum energy into the food. Great productivity, uniform results.
➔ Page 06

Cleaning and descaling
Automatic cleaning (including overnight), phosphate-free cleaning tabs, reduced cleaning chemical consumption - it doesn't get any cleaner than this. The Care system also prevents limescale.

LED cooking cabinet lighting
Seeing is believing: high-intensity, neutral-colored LED lighting makes it easy to keep an eye on food.

Productivity that fits your kitchen routine.

Unmatched cooking performance

ClimaPlus

The iCombi Classic's measurement and control center provides a constant, individually tailored cooking cabinet climate, ensuring top performance at all times. The powerful fresh steam generator provides optimum steam saturation, while ClimaPlus regulation, additional fans, and ideal cooking cabinet geometry allow high-performance dehumidification. Energy is transferred into food precisely, at exactly the right moment - and the iCombi Classic has plenty of reserve power for when it really matters. The result? Tray after tray of perfectly uniform results, even on large loads, while consuming up to 10% less energy and water. All with one goal in mind: helping cooks take their food to the next level through crisper crusts, crunchier breading, and more perfect grill marks.

Easily and intuitively.

Easy to use

It really is this easy: An intuitive control panel concept, easy-to-read symbols, and a selection knob with a push function make operating the iCombi Classic a breeze. It'll become second nature before you know it.

Individually programmable
Satisfied with your results? Great! Save them to a cooking program with up to 12 steps. You can store up to 100 different cooking processes.

➔ A whole new dimension of quality, reliability, and standardization.

85–265 °F

Steam mode
The steam generator generates humidity through fresh, hygienic steam, adjustable in increments of 10%. Together with constant cooking cabinet temperatures, it ensures optimum steam saturation and uniform cooking processes.

➔ For mouthwatering color and texture while preserving valuable nutrients.

85–572 °F

Hot Air mode
Hot air, circulating at precisely adjusted rates, flows around the food on all sides. The unit has enough reserve power to bake or pan-fry a full load of convenience foods, such as calamari, croquettes, cookies, or croissants.

➔ Top performance for top-quality results.

85–572 °F

Combi Steam mode
The advantages of hot steam combined with the advantages of hot air: short cooking times and reduced cooking losses, plus intense flavor and beautiful color. For exceptional results.

➔ No cooking losses, no drying out, just pure quality.

Effective cleaning

No matter how hard the iCombi Classic works, the automatic cleaning function can rise to any challenge. Light, medium, or heavy-duty cleaning with phosphate-free tabs, during the day or overnight. Or just give it a quick clean between uses, even without tabs. The Care System makes pricey water softeners and regular steam generator descaling unnecessary. And to make things even easier, all cleaning options are quickly accessible via the display.

➔ **Our number-one priority**
Making sure that you can always work quickly and easily with a perfectly hygienic cooking system.

Cost-effective.

Any way you slice it, this investment pays off.

Better performance, lower costs. Because you no longer need several conventional appliances, which saves you thousands in equipment investments. Because you decrease your product, oil, and energy consumption, so you never need to purchase some items in the first place. Because environmentally certified production, energy-efficient distribution, and phosphate-free cleaning agents represent sustainability, so you can go about your day with a clear conscience.

See for yourself.

This example is based on a restaurant serving 200 meals per day, using two iCombi Classic 10-half size units. The comparator unit does not have ClimaPlus.

➔ Worth it

It all adds up to an appliance that pays for itself in no time, while making work fun.
