SHIVA OR MAHADEVA

One of the most important deities in Hinduism is Lord Shiva, whose name means, "Auspicious one." Shiva is one of the deities that make up the Hindu triad, which consists of Brahma, the creator; Vishnu, the preserver and protector; and Shiva, the destroyer, who absorbs the manifest universe back into its original form of pure potential, then recreates it. All three deities have highly beneficial aspects. For example, if a person is ill and Shiva destroys the illness, it is an essentially beneficial act. In fact, Shiva can destroy anything that is not beneficial, and in doing so can bring good fortune to the devout.

Hindu mythology states Shiva resides at the top of Mount Kailasa in the Himalayas, where he resides in a perpetual state of mediation with his wife Parvati. His mountain is a sacred site of pilgrimage important to Jains, Buddhists, Hindus and others. There has been no attempt to summit Mount Kailasa because of its religious significance.

Scholars propose the origins of Shiva can be traced back to the Vedic god Rudra, who is first spoken of in an ancient text called the Rig Veda, which is dated to between 1700 and 1100 BCE. Both Shiva and Rudra are viewed as the same personality in a number of Hindu traditions, and share many similar qualities. Rudra was called the god of the roaring storm, and is often depicted as a fierce destructive deity, as is Shiva. Shiva's rise to power in the Hindu tradition was also facilitated by his identification with other Hindu deities including Agni, Indra, Vaju, and Prajapati. It appears, as Hindus found similarities between Shiva and pre-existing deities the older traditions became absorbed by those of the newer.
